

When they are proud of their new sign...

*It Shows!*

THROOP CHURCH  
Pasadena, California

Dear Partners at Peachtree City Foamcraft,

When a client orders a new stucco monument sign, the pressures are on to make it right. When they order two at a time like my last client did, it is mandatory that we are working with the very best in the industry. You fabricated our design flawlessly. You spoke up instantly when you had a question. You delivered on time as promised. Once again, you went above and beyond and made our service to our client all that we wanted it to be.

Our client is grateful. We are as well. We are on to the next project. We expect perfection from you again. Why? Because you have proven you can deliver it.

Sincerely,

  
President
